Ah Counter's/Grammarian's Report

When speaking, people may use crutch words or fillers such as "ah", "um", "you know", "well", etc., or may repeat a word or phrase, saying, for example, "I, I said…" or "We hope, we hope…" The Ah Counter helps the speaker become aware of these phrases which can be distracting to a listener. Grammarian provides a balanced review (positive / suggestions) on the use of English language during the meeting.
