Ah Counter's Report

When speaking, people often use such crutch words or fillers as "ah", "um", "you know", "well", etc., or they repeat a word or phrase, saying, for example, "I, I said…" or "We hope, we hope…" These words and sounds can be annoying to listeners. The Ah Counter notes these words and sounds and helps the speaker become aware of them. Also note speakers who do a great job or who improve in this area.
